Stop Elbit Systems - Updates

Eight year after the campaigning efforts against the Israeli military corporation Elbit Systems started, the struggle to Stop Elbit on the rise again. This document presents:

- Updated information about Elbit’s complicity with Israeli violations of international law and human rights
- The latest actions to Stop Elbit
- Current divestment campaigns, institutional investors and tips to think of when starting a divestment campaign
- A timeline of successes
- Useful links

The campaign is part of the wider BDS efforts which seek to hold Israel and its supporters accountable by pressuring Israel on all fronts – politically, culturally, and economically.

Elbit Systems - a symbol for Israeli apartheid

Founded in 1967, the Israeli company has become one of the world’s premiere “security and defence,” firms, specializing in military electronics, surveillance systems, Unmanned Air Vehicles (UAVs or “drones”), and security systems. It is a symbol for the Israeli economy, which essentially thrives on and fuels war, repression and control in Palestine and around the globe. Elbit Systems is built on the expertise of the Israeli Ministry of Defense Research Institute and has profited greatly from supplying the Israeli military with a variety of equipment used to sustain Israeli occupation of the Palestinian people.

“My main recommendation is that the businesses highlighted in the report [including Elbit Systems] – as well as the many other businesses that are profiting from the Israeli settlement enterprise – should be boycotted, until they bring their operations into line with international human rights and humanitarian law and standards."

The Special Rapporteur on the situation of human rights in the occupied Palestinian territories, Richard Falk, said in a news release issued as he presented a report on his work to the Assembly. (25th oof October 2012)

Elbit, the Gaza massacres and the Wall

Elbit fuels Israeli aggression

Elbit Systems has once again benefitted from Israeli military aggression during the latest onslaught on Gaza. Elbit's shares have risen 6.6% even though it's net income is still expected to call 7.7% this year. The company supplies the Israeli army since years with weapons, knowing that these are used for and facilitate internationally illicit acts. It benefits from this developing, testing and publicly presenting their products during Israeli military attacks and in the context of war crimes.

"Israel’s ability to launch such devastating attacks with impunity largely stems from the vast international military cooperation and trade that it maintains with complicit governments across the world."

(Call for a military embargo on Israel signed by six Peace Nobel prize winners, dozens of well known figures and tens of thousands more)

- 2014 (Protective Edge): During this military aggression on Gaza, Elbit weaponry has again been used. Elbit CEO Bezhalei Machlis confirmed during the conference call on the company’s results of the second quarter of 2014 that “our systems are being used by the IDF in the military aggression in Gaza”. While Elbit’s Skylark mini-UAV has been operational in Gaza since 2008, Protective Edge marked the first time it was used in quantities for high-tempo support of ground forces and was essential for a series of military operations that lead to killings of a still unknown number of civilians. The Hermes 900 (Kochav) was tested for the first time by the IAF during the operation. Based on this experience the drone will be further developed.

- 2008/9 (Cast Lead): Drones from the larger Hermes models can be outfitted with two missiles, and in addition to scouting and tracking targets, they were used in some of the more horrific incidents in the 2006 war on Lebanon and the 2008-2009 war on Gaza. In the 23-day assault on Gaza, missiles fired from drones were directly attributed to the killing of 78 Palestinians, including 29 children, and wounding 73 others. The Hermes infrared sensors enable a drone operator to read a license plate number determine whether a person on the ground is armed.

- Up to 2006: The Hermes 450 drones are described Elbit as “the backbone” of Israeli army and air force ISTAR [Intelligence, Surveillance, Target Acquisition And Reconnaissance] missions”. They have reportedly been deployed for surveillance and targeting missions in Gaza prior to 2006, and were reportedly central to IDF operations in Gaza and Lebanon during 2006, according to Elbit Systems.

Elbit, the Wall and settlements

The Israeli Apartheid Wall, which is crippling Palestinian communities by isolating them in walled-in ghettos and has been confirmed illegal by the International Court of Justice in 2004, has provided a massive source of revenue for Elbit.

- Elbit Systems provides “intrusion detection systems” for the Wall, in particular around Jerusalem.

- Subsidiaries Elbit Electro-Optics (El-Op) and Elbit Security Systems supplied and incorporated LORROS surveillance cameras in the Ariel settlement section as well as around Ar Ram.

- One product made by Elbit Systems, “Torch”, is manufactured specifically for use on the Wall.

- An armed UGV (Unmanned Ground Vehicle) was developed for patrolling the Wall’s buffer zone.

Elbit offers its experience to repress other people

In February 2014, Elbit won a contract with the US of $145 million to provide security equipment to the US-Mexico border wall. In 2006 its American subsidiary Kollsman Inc. won already a contract to participate in the creation of the US – Mexico border ‘Wall of Death’.

"All States are under an obligation [...] not to render aid or assistance in maintaining the situation created by such [the Wall’s] construction." International Court of Justice, 2004

Divest Elbit

Because of Elbit Systems’ conscious complicity with Israeli illegal policies, investors in and partners of the firm are accessories to Israel’s violations of international law and human rights. Some of the current divestment campaigns include:

Barclays’ invests in Elbit!
Write and post messages on social media calling on Barclays to withdraw immediately:

Via Avaaz: https://secure.avaaz.org/en/israel_palestine_this_is_how_it_ends_rbl?bkVEGhb&v=4273

Other ongoing campaigns:
* RMIT University (Melbourne, Australia) launched in 2013 a campaign against both BAE and Elbit Systems. The university receives funding for postgraduate research.
* Grassroots International launched in 2013 a campaign against TIAC-CREF to divest from Elbit Systems, as part of a broader effort regarding the pension fund.

Divestment successes

Several pension funds and financial institutions have pulled their investments from Elbit. The world is becoming increasingly unwilling to bankroll Israeli war crimes.

* September 2009: Norwegian State Pension Fund divests.
* September 2009: Kommunal Landspensjonkasse (KLP), one of the largest life insurance companies in Norway divests from Elbit

* January 2010: Danske Bank, the largest bank in Denmark and a leading player in the Scandinavian financial markets, divests, making it one of only 24 companies from which the Danish bank has divested. Thomas H. Kjaergaard, the staff member responsible for socially responsible investment at Danske Bank states: “We handle clients’ interests, and we do not want to put customers’ money in companies that violate international standards.”

* January 2010: Danwatch, the Danish financial watchdog adds Elbit to its blacklist of 35 companies that are disqualified from investments due to ethical considerations.

* January 2010: PKA Ltd., one of the largest Danish pension funds, sells shares in Elbit worth 1 million dollars. The PKA’s investment director, Michael Nellerman tells the Stop the Wall campaign that “the International Court of Justice stated that the barrier only serves military purposes and violates Palestinian human rights.”

* February 2010: Folksam, Sweden’s largest asset manager announces that it has no investments in either Elbit or Africa-Israel. Folksam’s Head of Corporate Governance, Carina Lundberg Markow, writes to The Electronic Intifada: “We have a strict policy regarding activity on occupied land.” She notes that KPA Pension, a leading Swedish pension company in the public sector, also did not have holdings with either Elbit or Africa-Israel.

* February 2010: ABP sells Elbit shares worth 2.7 million dollars.

* March 2010: The First, Second, Third and Fourth Swedish National Pension Fund (AP1, AP2, AP3, AP4) decide to exclude Elbit Systems from their investments.

* May 2010: Deutsche Bank announces Elbit does not meet its ethics standards. Yet, it remains one of Elbit’s biggest partners.

* April 2014: graduate students at the University of New Mexico in Albuquerque, USA, passed a resolution calling for divestment from companies profiting from human rights violations in occupied Palestine and at the US-Mexico border. The resolution targeted Elbit Systems following the company securing a contract for the US-Mexico border wall.

Institutional investors in Elbit

They can be found at: http://www.nasdaq.com/asp/holdings.asp?symbol=ESLT&selected=ESLT: As of August 2014 investors outside the US were:

- Allianz Asset Management AG, Seidlstrasse 24-24A, Munich
- Deutsche Bank AG, Taunusanlage 12, Frankfurt am Main
- AMP Capital Investors LTD, 50 Bridge Street, Sydney
- Barclays Global Investors UK Holdings Ltd, 1 Churchill Place, London
- Royal Bank of Canada, Royal Bank Plaza, Toronto
- Bank of Montreal, 1 First Canadian Place, Toronto
- Canada Pension Plan Investment Board, One Queen Street East, Toronto
- AXA, 25 AVE Matignon, Paris
- Swiss National Bank, Boerenstrasse 15, Zurich
- Credit Suisse AG, Po Box 900, Zurich
- UBS AG, Bahnhofstrasse 45, Zurich

Banks and public funds, universities, unions and churches have often an obligation to disclose their investments. It is up to you to check their investments.
Some useful tips to develop a campaign strategy

a) Discover the importance of the investment

Both large and small investments have their benefits and drawbacks as campaign targets. While the loss of a large investment makes a more tangible effect on a corporate policy, it may be more difficult to win the case. The loss of smaller investments may be easier to effect and are still effective in raising awareness and build precedents for future campaigns.

e) Use legal arguments

International and human rights law can be a useful tool. Elbit is in clear violation of international norms and activists can use legal arguments to convince or in special cases to enter into court.

Parliamentary action against Elbit

* Philippines: Civil society and Akbayan party work to cancel an Elbit deal during the coming budget briefing of the Department of National Defense. 1

* Brazil: The Defense Ministry is questioned about a recent arms contract with Elbit subsidiary Ares and asked to disclose details about the military relations with Israel. 2
